Commercial Cleaning Services

*Member since September 2013*

### **MANAGEMENT AND LEADERSHIP**

#### **Annual Environmental Goals**

*Epic Cleaning Solutions, LLC will continue to strive to improve our environmental performance over time by:*

- *Increasing the percentage of Green Seal products we purchase to more than 90%.*
- *Purchasing "No Touch" cleaning systems for deep cleaning of restrooms and other heavily soiled areas.*
- *Continuing to properly label spray bottles used for cleaners.*
- *Requiring that all staff undergo a green cleaning training program either through OGS on-line training courses or other available green training resources.*
- *Develop cleaning procedures that provide step-by-step guidelines for each task, including estimated times for task completion, required products, and safe handling of chemicals and equipment.*

#### **Environmentally Preferable Products and Services**

*Epic Cleaning Solutions, LLC will begin providing information to clients on ways they can improve their environmental performance while saving money. During client appreciation months, we will mail small office managers fun green tips that can help them save money and have a healthier office environment. We will gather information from the Maryland Green Registry website and the New York Green Cleaning Program.*

#### **Environmentally Preferable Purchasing**

*Epic Cleaning Solutions, LLC buys most of its products from the Leonard Paper Company, which sells many products that meet Green Seal standards.*

## **WASTE**

### ☒ **Solid Waste Reduction and Reuse**

*Epic Cleaning Solutions uses microfiber rags and mops. We also use high-performance carpet and floor cleaning machines with low environmental impact. High-performance cleaning machines are more effective in trapping and removing dirt, consequently reducing the amount of additional chemicals required for cleaning.*

### ☒ **Recycling**

*Epic Cleaning Solutions, LLC recycles all cleaning materials when possible. We provide easily accessible recycling bins in janitor's closets throughout our clients' facilities.*

## **TRANSPORTATION**

### ☒ **Efficient Business Travel**

*Epic Cleaning Solutions staff rides together over 15 times a year to provide services to locations that are 3-5 hours away to reduce vehicle miles travelled and reduce fuel consumption. The average roundtrip per job is 466 miles so fuel savings is \$68 per trip or \$1,360 per year.*

## **WATER**

### ☒ **Water Conservation**

*When cleaning toilets, sinks, and showers, staff is required to use as little water as possible. Sporadic checks completed by supervisors and owner ensure staff are following this policy when possible thus conserving water.*
